WMI LOAN HUB Operations
WMI's East Africa Headquarters in Sironko District, Uganda employs 25 staff. They are responsible for launching all new loan hubs, training, and monitoring WMI loan program operations. WMI's most experienced loan programs are being developed into resource hubs that can provide support to newer loan hubs. Sometimes a new loan hub also mentors a sister hub that is close by and shares the same language/culture. Pilot projects test alternative ideas. Special projects are locations where WMI has assisted another NGO in launching a loan program.
